modified polylinker; Site_1: EcoR I; Site_2: Not I;
UI-E-E01 is a normalized cDNA library containing the
following tissue(s): fetal eye. The library was
constructed according to Bonaldo, Lennon and Soares,
genome Research, 6:791-806, 1996. First strand cDNA
synthesis was primed with an oligo-dT primer containing a
support of site. Double stranded cDNA was ligated to an EcoR I
into pTTT3-Pac vector. The oligonucleotide used to prime
sequence that is located between the Not I site and the
(dT)18 tail. The sequence tag for this library is
Discovery in the Visual System, supported by National Eye
TAG. ITHR-TETS-TOT
                                                                                                                                                                                                                                  TAG_SEQ=CGCGTATACC*
